

NovaXp - The Next- Generation Blockchain

Building an ultra-fast, decentralized, and cost-efficient blockchain.

Core value: 100,000+ TPS, near-zero transaction fees, and high security.

Tagline: "Unleashing the Future of Blockchain."

Challenges of Existing Blockchains

Slow Speed

Ethereum: only 15 TPS

High Fees

Ethereum fees: up to \$50

Centralization

Solana: criticized for lack of decentralization

Scalability

Difficulty supporting millions of users

NovaXp - The Comprehensive Solution

- 1 Breakthrough Tech**
DAG, PoH, and PoS: 100,000+ TPS
- 2 Low Fees**
\$0.0001 per transaction
- 3 Decentralization**
Enhanced security and reliability
- 4 Smart Contracts 2.0**
eBPF and WASM: complex applications

NovaXp's Technological Architecture

1

**Hybrid
Consensus**

DAG + PoH + PoS

2

Networking

LibP2P + ZeroMQ

3

Storage Layer

RocksDB + IPFS

4

**Smart
Contracts**

eBPF/WASM

NovaXp vs Competitors

Blockchain	TPS	Transaction Fee	Finality Time
Ethereum	15	\$10-\$50	6 minutes
Solana	65,000	\$0.00025	400ms
NovaXp	100,000+	\$0.0001	200ms

Token Economics

Total Supply
1,000,000,000 NOVA

Investment Fund
10%

Core Team
20%

Ecosystem Dev
30%

Staking & Rewards
40%

Deflationary: 0.1% burn per block.

Roadmap

- 1** **Q1 2025**
Testnet launch, staking
- 2** **Q2 2025**
Mainnet deployment, DeFi & NFT expansion
- 3** **Q3 2025**
Cross-chain bridge (Solana & Ethereum)
- 4** **Q4 2025**
Fundraising and CEX listings

Team and Advisors

Chris (CEO)

10+ years blockchain experience

Jonh smith (CTO)

Former Solana/Ethereum engineer

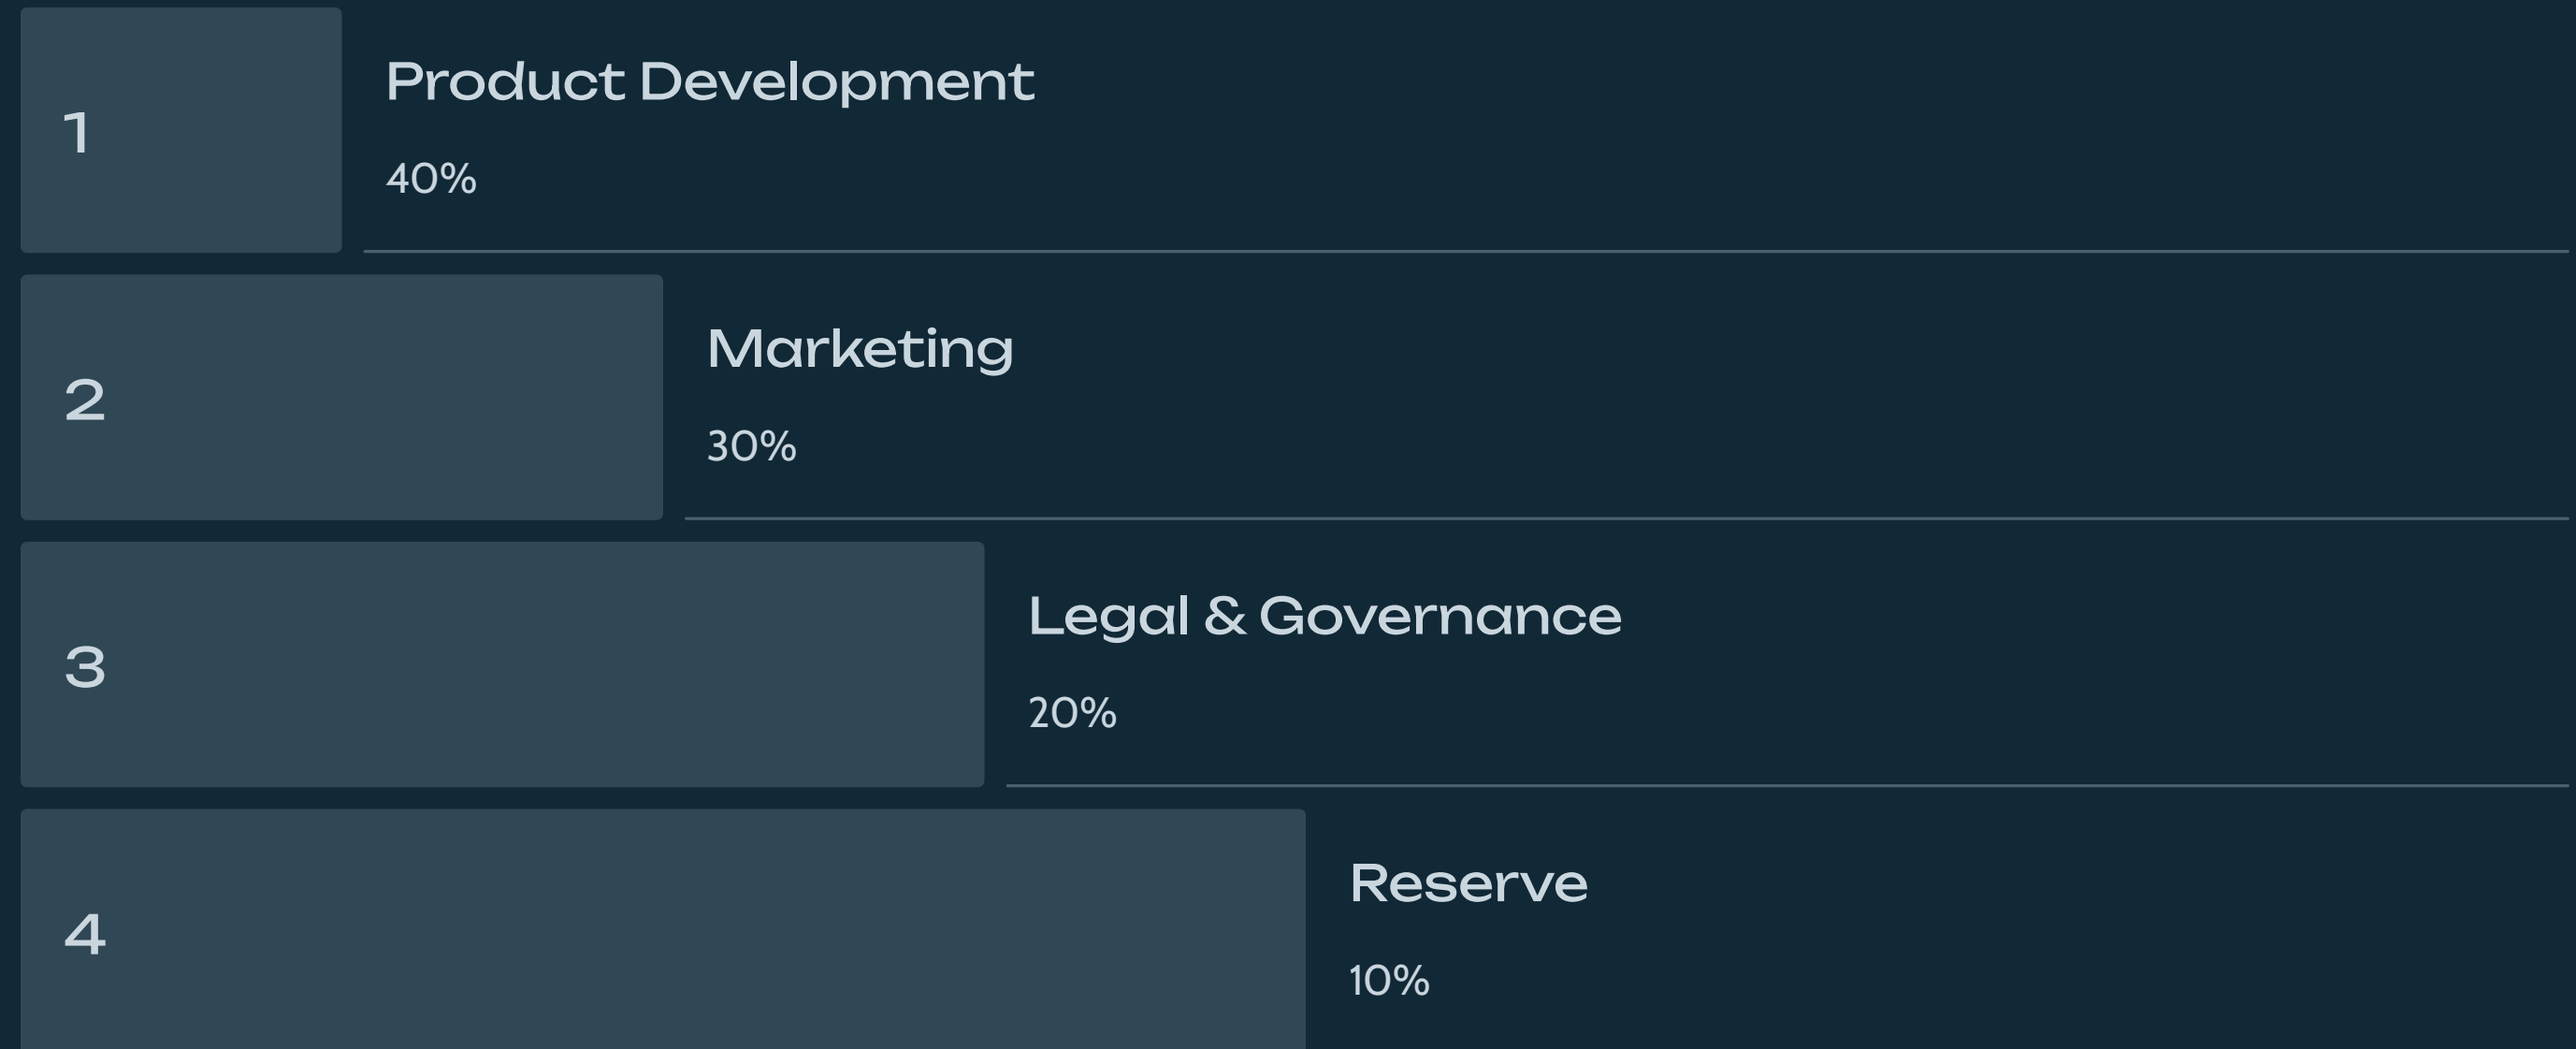

Alex Johnson (Lead Developer)

Smart contract expert

Advisors: Michael Lee, Sarah Kim, David Chen.

Fundraising Plan

Total: \$5 million. Valuation: \$20 million. Token: NOVA.

Let's Build the Future of Blockchain Together
